Eject-It #34 Carnauba Wax Release

Price-Driscoll's *Eject-It #34 Carnauba Wax Release* is a non-silicone, synthetic wax-based release for rubber molding, casting and encapsulating with epoxies, phenolics and molded thermoset plastics. It is a paintable alternative to silicone and fluoropolymer type releases.

Our NEW Eject-It #34 Carnauba Wax Release contains no silicones or oils, NO Class I or Class II Ozone Depleting Substances, is EPA compliant and is non-flammable.

Some of the features and benefits of *Eject-It #34 Carnauba Wax Release*:

Features

Non Silicone
No Build-up
Heavy Duty & Non-melting
Contains No Oils
Multiple Releases
Superior Part Fidelity & Finish
EPA Compliant

Benefits

Paintable; no need to wash or clean prior to post molding operations
Less down time
Heat stable to higher operating temperatures
Less rejects from piece marking as it contains no silicones or oils
Increased productivity
Improved quality
Contains NO Class I or Class II ozone depleting substances

Directions for best results:

- Make sure substrate is clean and non-porous.
- Remove all previous residue, release agent, etc.
- Hold spray nozzle about one foot from surface.
- Apply evenly and lightly.
- A very thin application will work effectively.
- DO NOT wet surface; use a light mist.
- A little goes a long way!

Packaging: *Eject-It #34* is readily available in aerosol cans, packaged 12 sixteen-ounce cans per case. Economical bulk aerosol disposable cylinders can be made upon request. Call for lead times.
